

Quiz

1. Which of the following best describes the primary goal of Artificial Intelligence (AI)?

- A. To create robots that can perform physical tasks.
- B. To simulate or exceed human intelligence using computers.
- C. To develop algorithms for data analysis.
- D. To build faster and more efficient computer hardware.

Answer: B

Explanation: The video defines AI as aiming to simulate or exceed human intelligence using computers, which encompasses a

2. What is the key characteristic that distinguishes Machine Learning from traditional programming?

- A. Machine learning uses more complex algorithms.
- B. Machine learning requires less data input.
- C. Machine learning allows machines to learn from data without explicit programming.
- D. Machine learning only works with numerical data.

Answer: C

Explanation: The video emphasizes that machine learning enables machines to learn from data and identify patterns without be

3. Deep Learning utilizes what type of structure to mimic the human brain?

- A. Decision trees.
- B. Neural networks.
- C. Expert systems.
- D. Rule-based systems.

Answer: B

Explanation: Deep learning is defined as utilizing neural networks to mimic the human brain, involving multiple layers of intercon

4. What is the primary function of Generative AI?

- A. To analyze existing data and provide insights.
- B. To generate new content, such as text or images.
- C. To optimize existing computer programs.
- D. To automate repetitive tasks.

Answer: B

Explanation: The video highlights that generative AI, including large language models, focuses on generating new content base

5. What role do Foundation Models play in the recent advancements in AI?

- A. They are used for building robots.
- B. They are the base for technologies like large language models, driving Generative AI.
- C. They are used for optimizing data storage.
- D. They are used for creating computer hardware.

Answer: B

Explanation: The video indicates that foundation models are the base of recent AI technologies like large language models and
